DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1-3 and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Washington et al.

In regard to claims 1, the Washington et al. reference discloses an "apparatus" (Fig. 4) comprising a "filling chamber" 62, a "rotating wheel" 28 having at least one "pocket" 30 defining at least part of a "lateral side" of "chamber" 62, and a "conveying device" 60 adapted to position at least one "article" 78 being produced having a "cavity" 82, as claimed.

In regard to claim 2, see "stationary drum" 32 and "vacuum chamber" 45 holding a negative pressure over a predetermined distance along recessed portion 38.

In regard to claim 3, see column 3, lines 13-23.

In regard to claims 8 and 9, see column 4, lines 44-49.

In regard to claims 10 and 11, the method as claimed would be inherent during normal use and operation of the device.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Washington et al. in view of Atwell et al.

The Washington et al. reference discloses the invention substantially as claimed (discussed supra), but does not disclose having a "chute" to supply material to the filling chamber. The Atwell et al. discloses another rotary transfer apparatus having a "chute" 100 that acts a retention reservoir to supply material to chamber 300. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Washington et al. device to have a supply "chute" in view of the teachings of the Atwell et al. reference in order to have a retention reservoir to further supply chamber 62.

In regard to claim 5, the Examiner takes Official Notice that it is well known in the art to retain screens such as "screen" 31 in rotary wheels by clamping them with rings.

Allowable Subject Matter

Claims 7 and 23-32 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
